

EPISODE 1.1

Given a piece of rectangular craft paper, we are certain that we can fold it and get $\frac{1}{2}$.

EPISODE 1.1

By repeating this process, we are also certain that we can get $\frac{1}{4}$, $\frac{1}{8}$, etc.

EPISODE 1.1

By repeating this process, we are also certain that we can get $\frac{1}{4}$, $\frac{1}{8}$, etc.

EPISODE 1.1

The numbers that we can get are $1, \frac{1}{2}, \frac{1}{4}, \frac{1}{8}, \dots$.

These numbers can be expressed as $\frac{1}{2^n}$, where n is any non-negative integer.

EPISODE 1.1

Question

How about $\frac{1}{3}$? Can we fold a piece of rectangular paper and get $\frac{1}{3}$?
